## Monthly Report

Sept.

# MATRIX

### Technology R&D

- 9.2 MATRIX Intelligent Contract Verification Platform: Implement AI-backed vulnerability detection with fault-tolerant protocols to protect against reentrancy attacks.
- 9.12 MATRIX Intelligent Contract Verification Platform: Built Secure Virtual Machine web service framework.
- 9.14 MATRIX Intelligent Contract Verification Platform: Built verification engine based on symbolic execution.
- 9.21 MATRIX AI Network 9/30 Testnet: Completed debugging.
- 9.24 Completed locked contact.
- 9.25 MATRIX AI Network 9/30 Testnet: Completed all processes test.
- 9.26 Deployed test intelligent contracts, blockchain browser and new wallet.
- 9.29 MATRIX AI Network 9/30 Testnet: Completed anomaly test.
- 9.30 Completed MATRIX AI 9/30 Testnet development.

### Marketing Activities

- 9.4 Turkey's largest media outlet, Hurriyet, published a detailed report on the MATRIX AI Network. The article outlined China's Internet development and focused on MATRIX's technological leadership in China's blockchain industry.
- 9.6 Introduced the MATRIX Mining Machine prototype and highlighted its special characteristics and related hardware parameters.
- 9.7 MATRIX was selected from over 200 projects to participate in the Global Blockchain Cases Summit. MATRIX CTO Dr. Bill Li spoke as a special guest and introduced the MATRIX AI Network architecture design and development experience.
- 9.9 The MATRIX team attended the Crypto DeepDive event in Shibuya, Tokyo's EDGEof space. The event was part of the The Nippon Foundation's SOCIAL INNOVATION WEEK SHIBUYA. The MATRIX team reaffirmed that AI technology holds the key to solving many of the challenges currently plaguing blockchain solutions.
- 9.10 Ramesh Ramadoss, Co-chair of the IEEE Blockchain Initiative, visited the MATRIC Research Institute to discuss the future of blockchain standards.
- 9.16 TCPMedia magazine wrote about the MATRIX AI Network and commented that the "MATRIX AI Network will be able to serve people in all aspects of life."  
  
MATRIX released a video demonstration of the MATRIX auto-coding Intelligent Contract.
- 9.19 Huobi's HADAX exchange was upgraded to Huobi Next and merged with Huobi Global. All tokens on HADAX, including MAN, were moved to Huobi Global.
- 9.20 MATRIX CTO Dr. Bill Li and NiuQi Ventures founding partner Mr. Wang Jingyuan were both invited to a live broadcast on leading Chinese blockchain news platform BiShiJie. They discussed blockchain from both technical and venture capital perspectives. Over 1.3 million viewers tuned in.
- 9.21 Introduced the MATRIX Secure Virtual Machine's innovative on-chain AI-backed security measures that protect the integrity of Intelligent Contracts.
- 9.25 Announced the impending launch of the MATRIX testnet.

### Community Building

- 9.1~9.30 Membership growth in major communities
